Magician in a hurry

A. Answer these questions.

1. Is this a sad or a funny play?

Ans:- It is a funny play.

2. Which parts of the story made you laugh?

Ans:- The parts of the story which made me laugh are when the midwife says that the baby looks more like a donkey than a human being and when Abra says that there was a row of donkeys at the office waiting to take admission in the school.

3. Whom would you blame for Abra's life- his mother, father or the magician? Why?

Ans:- I would blame the magician for Abra's life because he was the one who had not used his magical powers wisely and had worded his wish incorrectly as he said, 'May you have the donkey's fortune.'" and so the couple had a baby that looked like a donkey.

4. Why do you think Abra's classmates and teacher didn't like him?

Ans:- Abra's classmates and teacher didn't like him because he looked like a donkey although he was a human being but they were driven only by looks and thought that he was a real donkey.

5. What is the underlying message of the play?

Ans:- The underlying message of the play is that think before you speak and accept people as they are, also do not to judge a person by his appearance.
